## Crystal Ball

I hope after  
high school to go to university  
and finish with a good education. After school I  
hope to become an anesthesiologist or a veterinarian.  
I hope I will get married to someone I love and maybe have  
one kid. If the kid was a girl, I like the name Violet, if the kid  
was a guy, I like the name Indigo. I want to own a snake,  
a turtle, and other reptiles, also I hope to live in a nice  
sized house somewhere warm. One day I also hope to  
go to Australia, Ireland, Greece, Italy,  
and other places.

S

Crystal ball

Surgeon

in my i hope to  
graduate from high  
school and get a bachelors  
degree in medicine at U Vic. Afterwards  
i would like to apply to UBC to further my  
path in the medical field. Then after all my schooling  
would like to move to wherever my career takes me. i  
eventually would like to get married and have kids, maybe  
two. I would like to slowly spend less and less time  
at work and more time with my family. I  
want to have a pet. I think a dog would be  
best. I would also like to travel a lot.  
Maybe to England or Italy.  
I hope this is where my  
future takes me.

Crystal Ball

- Future

When I graduate  
I would like to take business  
courses at Camosun College and then  
get my degree at UVic. After that I  
want to do my post-grad in Glasgow. I would  
enroll in their investment banking program. Once  
I'm done all of my schooling I hope to live in  
Toronto because it's a great business center  
and it's still Canadian. After many years of work  
I want to live in a penthouse suite. By the time  
I'm forty I'll make it rain in specially ordered \$1000  
dollar bills and flick them off the terrace of my suite.  
I will drive a Lamborghini and I'll have a private  
jet to take me anywhere, any time. Hopefully I  
will still be connected with my family and I can  
help support them with my wealth.

*Letter to Grade 5 Self*

*Dear Grade 5 Sierra,*

*In grade six, you are going to be in Mrs. Rozens class, in the west pod. You will be with your friends from elementary school, but will also make some new friends from your class. Over all, grade six is a really fun year, you go on a lot of field trips and the work isn't too difficult. You're also in band for your first year and you seem to enjoy it. You make the honor roll with A's and B's in every class.*

*Grade seven is a little harder than grade six but still pretty easy. You're still in the west pod and your teachers are Mrs. Dunabetia and Mr. McCully. However these teachers don't teach you academics and will only be your homeroom. You run around the school a lot from class to class. Almost every class has a different teacher so be quick when changing classes. At the end of the year there is a strike so you won't get your report card for third term until next year, but you do make it on the honor roll.*

*Grade eight is the hardest year as expected but you struggle in math a bit this year and other subjects due to missing classes because of sickness. You're still in the west pod and you're in Mr. MacDonald's (Mr. Cool's) Class. Grade eight is a really fun year despite the struggles in some subjects, I suggest you ask for help when you need it and not wait last minute. You're still friends with all your friends from elementary school and some of the friends from grade six. Over all it's going to be a great year and I'm going to leave the rest for you to find out.*

*Sincerely, Grade eight Sierra.*

## Letter To Grade Five Self -Life's Questions?

Dear Grade Five Hunter,

I would like to inform you about your future!

In grade six you will have Mr.Kovacs as a teacher. The only other kids in your class that will have come from Keating Elementary are Julian and Ryan but you'll become great friends with Liam Burrell by the end of the year. Throughout this year Mr.Kovacs will have to leave for a few months at a time because his son will be battling cancer. Don't fret! You will have Mrs.Blaikie as a substitute. After getting to know her well, you throw her a surprise party for her birthday. You really will enjoy grade six!

Grade seven is a blast! Mme.Levesque is your teacher and she likes to have fun! You go on plenty of field trips and play lots of games. Don't be fooled though. There is still lots of work to do. This is your last year of small amounts of homework. In science you learn about chemistry and it's a lot of fun! Grade seven is super cool!

Your last year at Bayside- grade eight! Mr.Mac is your teacher and you also have Ms.patel, Mme.Levesque(again), and Mme.Caron. By April Mme.Caron retires so Mme.Shuh steps in. They're all great! There will be many fields trips and the year is pretty relaxed. There is more work but it's all interesting and worth working on!

Bayside is a great school and you will have lots of fun!

## Letter to grade five self

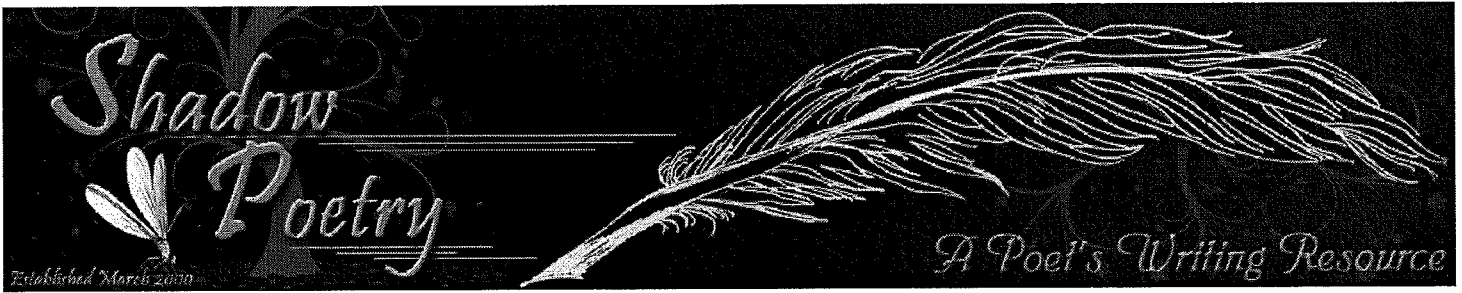

### View of the past

Dear grade five self,

Get ready because the next couple years are going to be quite an adventure.

Grade five is a breeze, though your teacher isn't the most exciting. You will love grade 6, honestly this will feel like such a great year for you, but I wouldn't waste your time with Vinny, just saying... Your grade six teacher will be one of your favourite teachers.

Grade seven is going to be interesting. it will have its ups and downs but I know you'll handle it. Mom and dad are going to start fighting and it'll feel crazy for a bit but don't be afraid to speak up, honestly it's better if you do. Grade 8 is going to be not what you were expecting. You're going to be living on the island with just mom (they got divorced over the summer) it'll be stressful for a bit but it'll smooth over soon enough! By the way, you'll have some amazing friends here on the island.

Tetractys

Tetractys, a poetic form invented by Ray Stebbing, consists of at least 5 lines of 1, 2, 3, 4, 10 syllables (total of 20). Tetractys can be written with more than one verse, but must follow suit with an inverted syllable count. Tetractys can also be reversed and written 10, 4, 3, 2, 1.

Double Tetractys: 1, 2, 3, 4, 10, 10, 4, 3, 2, 1

Triple Tetractys: 1, 2, 3, 4, 10, 10, 4, 3, 2, 1, 1, 2, 3, 4, 10

and so on.

"Euclid, the mathematician of classical times, considered the number series 1, 2, 3, 4 to have mystical significance because its sum is 10, so he dignified it with a name of its own - Tetractys. The tetractys could be Britain's answer to the haiku. Its challenge is to express a complete thought, profound or comic, witty or wise, within the narrow compass of twenty syllables." - Ray Stebbing
