

## Practice

Find the length of the third side of each right triangle, to the nearest tenth of a metre.

1.

2.

8. The base of the Pyramid of Khufu is a square with sides 230 m long. Calculate the length of the diagonal of this square, to the nearest tenth of a metre.

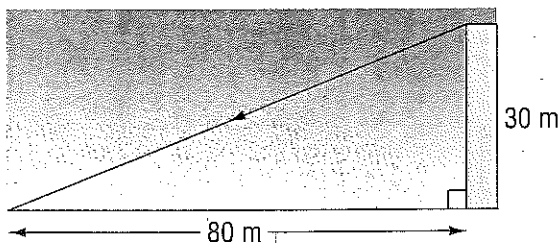

9. An RCMP patrol boat left Long Beach, British Columbia, and sailed west for 2 h at 15 km/h, then north for 2 h at 20 km/h, then east for 1 h at 10 km/h. How far was the patrol boat from Long Beach, to the nearest tenth of a kilometre?

## Problems and Applications

3. A 7-m ladder is leaning against a wall of a building. The foot of the ladder is 2 m from the base of the building. How far up the wall is the top of the ladder?

4. A ship left Shippegan, New Brunswick, and sailed east at 20 km/h for 2 h, then south at 25 km/h for 1 h. To the nearest tenth of a kilometre, how far was the ship from Shippegan?

5. A camp swimming race starts from the end of a 30-m long pier. The finish point is on the shore 80 m from the foot of the pier. How long is the race, to the nearest metre?

6. Describe how you could use mental math to estimate  $c$ .

7. Find  $x$ , to the nearest tenth of a centimetre.
